Security Monitoring & Alerting

### Log Monitoring, Analysis, Threat Intelligence, & Alert Management

Enterprises can generate millions of log alerts everyday making the recognition and analysis of meaningful alerts in real-time a complicated, resource-consuming challenge. Today, security teams are struggling to stay focused on managing resource bandwidth, finding security skill-sets, and simply keeping the lights on. But there's a solution that can put you in control. ARMR security monitoring solutions managed by our team of certified security analysts offer the focus and expertise required to meet your objectives 24/7/365. That means peace of mind, and the time and resources needed to concentrate on keeping up with strategic innovative business demands

Powerful Delivery Architecture

ARMR solutions are products of industry veterans responsible for building what are now some of today's leading worldwide service delivery platforms. Our team has deep insight and proven success into the complexities and requirements of delivering managed security services. We are keenly focused on the end user experience, and we take a visionary approach when it comes to staying ahead of anticipated growth and demand. Our proprietary next-generation management platform for all ARMR Security Managed Service Solutions, not only meets today's needs but is flexible and powerful enough to anticipate tomorrow's demands, proactive in identifying compromising before the crisis becomes full-blown.

ARMR's customer portal provides unprecedented visibility into an organisation's security positions so they can:

- View and customise dashboards and reports
- Leverage analytics to reveal business intelligence
- Download reports
- Review and search alerts
- Open and manage tickets
- Access the ARMR knowledge base
- Manage assets and system inventory
- Visibility into outside real third party threat intelligence

Features

- 24/7 real-time monitoring, alerting & analysis by certified security analysts
- Integrated business intelligence & analytics to make better business decisions
- Asset classification & reporting
- Threat intelligence
- Flexible & customizable reporting
- Easy integration with existing workflow products
- Pre-built security & compliance reports

Real-Time Visibility & Actionable Intelligence

Enables you to:

- Identify & protect against persistent and evolving threats 24/7/365
- Achieve log monitoring compliance requirements for industry regulations such as PCI DSS, GLBA, NERC, CIP, & HIPAA
- Gain unprecedented visibility into the organisation's security posture through customisable dashboards & reports

Managed Services Solutions

- Proprietary, next-generation management platform
- Intelligently reduces numbers of alerts entering 24/7 SOCs, enabling analysts to identify key protections & provide consistent, high quality service
- Collects, normalizes, & assesses log streams before sending alerts to ARMR data centers for further correlation & analysis
